LUCAS ROSELLO

FULL-STACK DEVELOPER

About me

I am a person with a voracious hunger for knowledge, who takes every challenge and obstacle as an opportunity to grow and be better.

I look for the opportunity in every adversity and I achieve what I propose, since, for me, achievements are the results of the decisions that are made and the goals that we set ourselves.

I feel a great facility in being able to relate and generate bonds with people to the level of being able to empathize and understand their actions.

I constantly challenge myself to get out of my comfort zone and I believe that improving is a task that is developed day by day. As a purpose I try to improve who I am and what I do constantly; that is why I owe much of my knowledge to self-study.

Talents

Teamwork	Good interpersonal relationships, empathy and productive channeling of stressful situations. Good integration to the group and ability to blend-in.
Organization	Good handling of multiplicity and divergent information, as well as agendas, organization charts and flow charts. High tolerance to frustration and stress.
Communication	Excellent command of spoken and written language, as well as of formal and informal settings for the effective transmission of information. Ability to speak and formally state reasons and assertiveness.
Work under pressure	Satisfactory responses in time trial and closing situations, as well as in the handling of deadlines and improvisations.
Leadership	Fluency in the integration and coordination of multidisciplinary work teams. Willingness for effective decision-making in consultation and communication with the group
Problem resolution	Independent and creative thinking skills, think-outside-the-box and comfort in frequent changes of perspective. High job adaptability and versatility. Proactive and ambitious attitude. Good disposition for negotiations and mediation in conflict and pressure scenarios. Persuasiveness.

Knowledges

I have passed several relevant certifications and courses, among which the following stand out: Cloud Practitioner (Amazon), Career of GoLang (Platzi), Full-Stack Developer (UTN)

I have extensive experience developing Rest APIs and microservices in JavaScript (Express.js), PHP (Symfony), and Go (GinGonic). I have developed from scratch in these frameworks and I feel comfortable.

I also have experience with Frameworks and FrontEnd Libraries such as AngularJS, Angular and React.

I Work with relational databases (SQL Server and MySql) as non-relational (MongoDB and Redis).

I have led teams in the development of microservices as well as participated helped to develop them.

I have also implemented on my own and helped implement tools like GitHub Actions, Docker, Jenkins, Azure and AWS.
